# *Dear Astrology Lover,*

This **2026 Astrology Reference Guide** was created as a simple companion for our **2026 Forecast Panel**... a way to help you stay oriented in time while our astrologers focus on the deeper themes and stories shaping the year ahead. You can use this guide to follow the larger arc of 2026 as it unfolds, anchoring the conversation in a clear sense of chronology.

The transits included here were chosen intentionally. You'll find all **planetary stations, eclipses, solstices** and **equinoxes**, **major planetary ingresses** from Venus outward, and the most significant **outer-planet alignments** where the slowest planets tend to speak the loudest. You'll also find a page with all **New** and **Full Moons** of 2026.

This is by **no means a comprehensive list** of transits, but a curated map highlighting the moments most worth noting. If you'd like access to a complete 2026 transit list, **you can click here** to download the full reference.

Let this guide support you as we explore what 2026 is truly inviting us into.

With love,

*Amanda*
