AWAKEN YOUR VOICE
NOVEMBER 2026 AWAKENING

Awakening *(noun)* – Dreams are frequencies. To speak them, you must translate vibration into language. Your voice is not sound. It is your essence made audible.

ENERGY

Merlin teaches you the art, the science, and the skill to translate vibration into language. The **art**: Listen for the feeling before the words. Notice the images that repeat. Sense the direction your energy wants to move. The **science**: Every dream has a structure. Every desire has a signature. Every intention has a tone that becomes a word. The **skill**: Speak from the center of your chest, not your mind. Let the words rise like breath, not be forced. Trust the first phrase that arrives - it is always true.

Lesson – To awaken your voice, you must learn the art, the science, and the skill.

GUIDES

Clio places her hand lightly on your throat. A soft vibration begins to awaken your voice center. She guides you to practice: Feel your dream in your body. Let it rise to your heart. Allow it to move to your throat. And then . . . let it become sound.

Lesson – It's important to speak your request out loud - even if only a whisper. Then you have spoken your dream into existence.

MINDSET

As your voice touches the air, you feel:

- A new fluency with your dreams.
- A new confidence in your voice.
- A new ability to articulate your desires.
- A new readiness to speak your requests out loud.

This is your activation.

Lesson – Your voice shapes your destiny.
